

RDFV0300

CrossMatch Verifier300 USB LC Fingerprint Reader

The biometric finger print reader is a highly versatile reader/verifier device that can rapidly retrieve an individual's finger print. It is connected to FAST-PASS® via USB and can be used with our Sentry, Registration, and Manager Modules. An embedded processor counts minutiae ridges to ensure that only a quality print is captured. It also detects that a new finger is present and automatically captures the print in seconds.

VERIFIER 300 LC FEATURES

- Generous platen area (1.2" x 1.2")
- High Contrast (ANSI-NIST compliant)
